

ROOM B EVIDENCE PACK v1

Purpose: Human-reviewed transcription of the Room B survey evidence for a future Codex 2D reconstruction.

Status: Ready for repository use, subject to explicit cautions.

Units: millimetres unless stated otherwise.

Scope: Room B only. WC is not reconstructed; SUP-079 is a contextual tie.

1. Survey conventions and cautions

- Wall plane, tile face, outer casing, inner casing and door face are separate layers.
- Coincident wall/casing aliases are preserved.
- Approximate and ranged readings must be down-weighted.
- Annotated photographs are essential evidence.
- The soffit is only partially surveyed.

2. Room B baseline chain

ID	Start	End	Reading	Interpretation
BASE-B-01	B0	D3-BL	0	Same physical point; wall runs into D3 casing.
BASE-B-02	D3-BR	B0.5	249	Inserted intermediate node.
BASE-B-03	B0.5	D5-BL / B1	823	D5-BL and B1 coincide.
BASE-B-04	D5-BR / B2	B2	0	D5-BR and B2 coincide; local 20 mm cutaway.
BASE-B-05	B2	B3	1218	Clear.
BASE-B-06	B3	B4	1665	Tile-face measurement; approx. 10 mm build-up behind nodes.
BASE-B-07	B4	B0	~2010-2030	Very approximate; shower-screen obstruction.

3. Room B supplemental measurements

ID	From	To	Reading	Note
SUP-065	B0 / D3-BL	B0.5	888	Clear.
SUP-066	B0 / D3-BL	B2 / D5-BR	~1952	Difficult shot.
SUP-067	B0 / D3-BL	B3	2755-2765	Corrected range.
SUP-068	B0.5	B2 / D5-BR	1182-1190	Range.
SUP-069	B0.5	B3	2228	Clear.
SUP-070	B1 / D5-BL	B4	2673	Clear.
SUP-071	B1 / D5-BR	B4	2014	Human-confirmed alias and reading; see caution.
SUP-074	B2 / D5-BR	Start of soffit	192	Feature location only.
SUP-075	Floor	Ceiling at B4-B0	2281	Vertical.
SUP-076	Floor	Ceiling at B2 / D5-BR	2274	Vertical.
SUP-079	B0 / D3-BL	WC T2	3674	Only B-WC tie; contextual validation only.

SUP-071 caution: Preserved exactly as human-confirmed: B1 / D5-BR to B4 = 2014. This differs from the separate baseline alias D5-BL / B1. Do not silently reconcile; inspect photos and node-reference files or stop for human review.

4. Door D3 - Room B face

Left side

Segment	Reading	Meaning
B0 / D3-BL to inner casing	80	Horizontal run to the point where casing drops inward.
Inner casing to door face	105	Inward run to door face; forms an L-shape with 80 mm.

Right side

Segment	Reading	Meaning
D3-BR to inner casing	65	Opposite-side horizontal run.
Inner casing to door face	105	Inward run to door face; opposite L-shape.

Main D3 measurement	Reading
Door face width	763
Door face height	1975
Floor to casing top	2076
Casing top to ceiling	221

Instruction: Do not model D3 as one flat rectangle. The side measurements define stepped L-shaped offsets.

5. Door D5 - Room B face

Measurement	Reading	Note
Casing width	874	Room B face.
Casing height	2157	Room B face.
Top casing to ceiling	237	Room B face.
Door height	1974	
Door width	761	
B1 / D5-BL to inner casing	65	Left side.
Inner casing to door face	80	Left side.
B2 / D5-BR to inner casing	81	Right side.
Right inner casing back to door	97	Right side.

D5 cutaway: Approximately 20 mm local cutaway around the tiled wall and door/casing junction. Inspect annotated photos; do not assume one uninterrupted wall plane.

6. WC-side D5 values - context only

Measurement	Reading
WC-side casing width	898
WC-side casing height	2057
WC-side top casing to ceiling	225
WC-side casing left to door	83
WC-side casing right from T0 / D5-WCR	52

7. Ceiling and soffit

Evidence	Reading	Interpretation
Floor to ceiling at B4-B0	2281	Local height.
Floor to ceiling at B2 / D5-BR	2274	Local height.
B2 / D5-BR to soffit start	192	Start only; full soffit unresolved.

8. Reconstruction scope and stop condition

- Reconstruct Room B only in 2D SVG.
- Include D3 and Room B face of D5.
- Use SUP-079 only as a B-WC tie check.
- Do not fit full WC, Room C, Room A, or full soffit.
- Do not proceed to 3D before human acceptance.
- Stop for human review if D5 aliases or cutaway remain ambiguous.
