

ROOM WC EVIDENCE PACK v1

Purpose: Human-reviewed transcription of WC evidence for a joint Room B and WC 2D reconstruction.

Status: Ready for repository use alongside ROOM_B_EVIDENCE_v1.md.

Units: millimetres unless stated otherwise.

Scope: WC evidence only, solved jointly with Room B. No Room A or Room C.

1. Survey conventions and cautions

- T0-T3 describe the WC finished boundary.
- D5-WCL and D5-WCR are WC-side door/casing references.
- Wall plane, casing and door face remain separate layers.
- Approximate readings stay approximate.
- The WC and Room B form one joint solve through D5 and SUP-079.

2. WC baseline chain

ID	Start	End	Reading	Interpretation
BASE-WC-01	T0 / D5-WCR	T1	1643	Clear; T0 and D5-WCR coincide.
BASE-WC-02	T1	T2	1078	Clear.
BASE-WC-03	T2	T3	690	Clear.
BASE-WC-04	T3	D5-WCL	171	Clear.
BASE-WC-05	D5-WCR	T0	0	Coincident wall/casing point; photograph required.

3. WC supplemental measurements

ID	From	To	Reading	Note
SUP-072	T0 / D5-WCR	T2	1959	Clear cross-check.
SUP-073	T1	T3	~1970	Approximate cross-check.
SUP-077	Floor	Ceiling at T0 / D5-WCR	2289	Local height.
SUP-078	Floor	Ceiling at T3	2277	Local height.
SUP-079	Room B B0 / D3-BL	WC T2	3674	Only direct B-WC tie; use in joint solve.

4. Door D5 - WC face

Measurement	Reading	Note
WC-side casing width	898	Visible casing face.
WC-side casing height	2057	
WC-side top casing to ceiling	225	
WC-side casing left to door	83	
WC-side casing right from T0 / D5-WCR	52	

Instruction: D5 is shared with Room B. Preserve both faces separately and stop for review if they cannot be reconciled without inventing wall thickness.

5. Joint reconstruction scope

- Solve Room B and WC together.
- Use D5 and SUP-079 to connect them.
- Produce one joint 2D SVG.
- Exclude Room A and Room C.
- Do not model the full soffit.
- Do not proceed to 3D before human review.
